

R P F Morrison - Price List

My minimum price is £50 - this will apply for any quick jobs and includes overheads like admin, instrument handover, and diagnosing any problems.

I may adjust these prices based on the exact nature of the instrument and what I deem needs doing. For example, adding £20 for an instrument with more than 8 strings, adding £30 for a bound fretboard, or applying a discount if I don't need to do the full range of work specified. I will always discuss this with you beforehand and agree on a course of action and price(s).

In general, new strings are not included in the quoted prices, except at my discretion. Standard fret wire, where used, is included. Non-standard fret wire (e.g. stainless steel) is not.

Simple setup adjustment plus optional string change	£50
Instrument check-up, clean and polish, plus string change	£50
Full setup (combines the two previous jobs)	£100
Fret level only, with minimal other adjustments	£100
Full setup and fret level (combines the two previous jobs)	£200
Full re-fret	£300
(Removal of the old frets, fingerboard levelling, and installing new frets followed by full setup and fret level as above)
